

# BULLETIN

## Strap-on for Safety

Endura XL Interceptors are designed for the separation and retention of FOG and solid waste material as a by-product of food service establishments and many other applications.

Add a Safety Strap to your interceptor with an Endura XL Safety Strap Kit

#### ENDURA XL SAFETY STRAP KIT

Part Number	40100SSRK
-------------	-----------

#### KIT COMPONENTS

Description	Part Number	QTY.
ENDURA XL SAFETY STRAP	40100-11	2
.5" PLASTIC SPACER	40100-30	8
5/16-18 1-1/2" LAG BOLT	40100-9	8
INSTALLATION INSTRUCTIONS	0440100-INS	1

## Features

- Made of durable polypropylene material that resists degradation over time
- Flexible design that allows for proper cleanout during maintenance
- Load tested to comfortably withstand the impact of a human fall

The Endura XL Safety Strap is an optional attachment to any Endura XL Interceptor: past, present and future! The device may be assembled during new installations or added to any Endura XL Interceptor currently in operation. Detailed installation instructions are provided with the kit. The Endura XL Safety Strap provides an added level of protection to workers during cleanouts and to the public at large.

### WARNING

The Endura XL Safety Strap is designed exclusively for use with Endura XL Interceptors and must be installed following the installation instructions provided. Any unintended use of this device is strictly prohibited and may result in permanent damage to property and in unsafe usage of the safety strap that may cause serious injuries, including fatalities.
